Our Goal

The GameTrac Proxy Betting platform enables remote players to view casino tables live on their computer, tablet or mobile device from anywhere in the world. GameTrac Proxy Betting platform has been developed by experienced casino industry personnel who through years of experience know what the players want, and how best to deliver those needs.

Using their smart phones, remote players will be able to talk to either their own proxy or an assigned agent from the casino staff directly into their IP phone at the table. Users can enter the site, login, select the available table online and place a call to their assigned proxy or casino appointed agent.

Our goal is to offer you the client, a fast and efficient service using the most modern and robust technology available.

BACCARAT

Dedicate 2 inter

of at least om two independent service providers

balancing device used to connect both service providers, this device will make internet connections more stable

Pricing

Type of engagement: **Product roll-out**

Roll-out duration: **2 Weeks**

Software Lease Option - Minimum Number of Tables - 5

GameTrac Provides: Support & Maintenance	Additional Tables At No Cost	DETAIL: Minimum 12 month lease, 3 months paid in advance
Up To 5 Tables	US \$2000 Per Table	5 tables & above = a flat monthly lease fee of US \$10,000
Monthly License & Hosting Fee (Website)	US \$250	

* Roll out duration assumes all hardware has been purchased and is on site ready for install.
Payment terms: 50% paid in advance, remaining balance paid on completion.

Assumptions

- Pricing is for use of the GameTrac Platform and professional services; no hardware or software licenses provision is included.
- The installation will start within 7 days of the 50% deposit received into our bank account.
- Pricing includes remote support and training for 3 months after product delivery.
- GameTrac will assign a Focal Point to act as an escalation point for any team issues (performance, training). This resource will perform the kick off meeting and will have no cost to the client.
- The client will assign a Product Owner or Focal Point to act as a communication channel, and the provision of all functional documentation, release notes or equally important elements before starting the project.
- Pricing does not include travel expenses except for the listed onsite resource's accommodation and per diem. Flight costs will be charged separately following client's approval.
- The client will be in charge of providing general project objectives, requirements, risks and constraints.
- If the client does not already have a hosted domain name, the client will need to register a domain name and arrange web hosting that supports ASP.NET web platform.
- The client must participate in a kick off meeting at the start of the engagement in order to assure alignment on engagements facts.
- In case it's needed, the client will facilitate the appropriate invitation letter to request the necessary visas according to all immigration authorities' timeframes.
- This proposal suggests the use of agile methodology, by which the backlog, priorities and effort estimations are refined sprint by sprint as new information is made available to the team.
